eAlberto

Advanced E-Learning Management System

## What is eAlberto

eAlberto is the best e-Learning management application. One can create unlimited courses and lessons with easy to use dashboard.

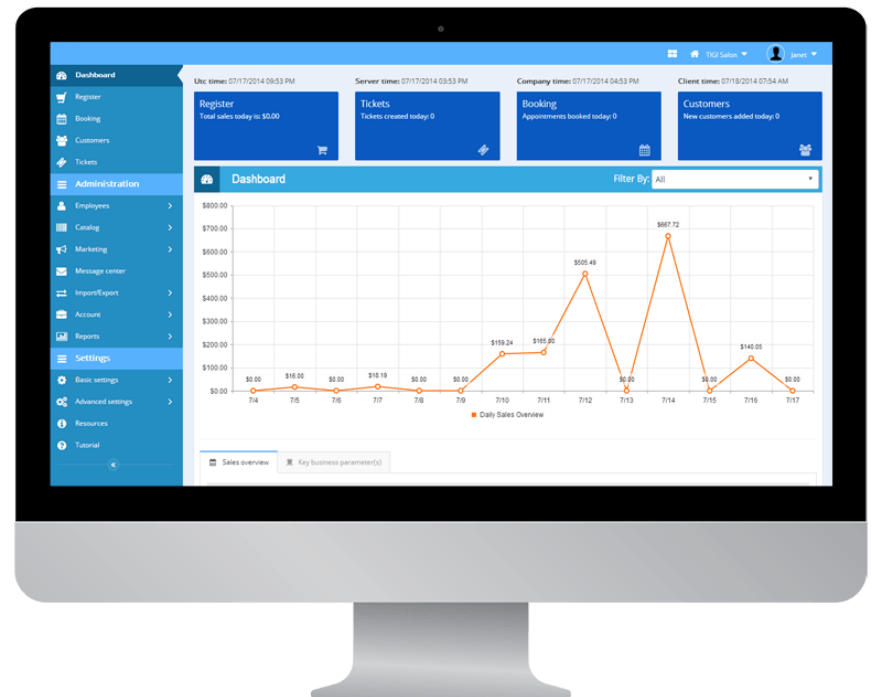

The lesson can be video, document, YouTube video and external content link. The interesting part is you can link one or more exams to a course, after finishing the course the student can take the linked exam and teacher/admin can view the exam results to monitor the student's progress.

This LMS system is built to manage learning content easily and effortlessly. The interface is very user friendly.
