SEOmetry

All in one Geometry of SEO

Highly Detailed Tools for SEO
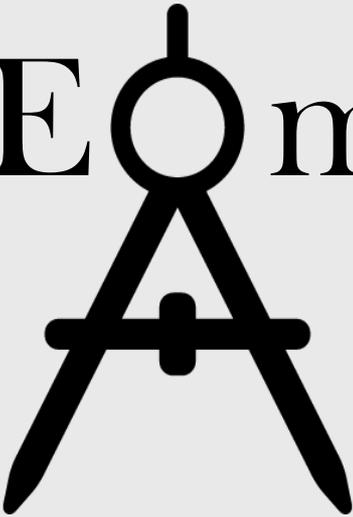

SEOmetry

WHAT IS SEOMETRY

SEOmetry is a web based solution for all next-generation tools for search engine optimization. SEOmetry is integrated with all the necessary tools and software in today's SEO world.

SEOMETRY FEATURES

✓ Google SERP

Find your current rank on Google for all of your keywords. Checks the first 250 results

✓ Bing SERP

Find your current rank on Bing for all of your keywords. Checks only the first 100 results.

✓ Top Search Queries

Displays the top search queries that lead visitors to your website, as well as the estimated monthly search volume, CPC, and percentage of your total searches for each query.

SEOMETRY FEATURES

✓ Indexed Pages

Calculates the total number of pages that Google and Bing have indexed for your site.

✓ Robots.txt

Reads and parses your robots.txt file to find sitemaps and rules. These findings are displayed in an organized table.

✓ Sitemap

Briefly scans your website to find sitemap files. Each sitemap is displayed along with the status code, format, number of entries in the sitemap, and a percentile representing how hard it will be for Google and Bing to find the sitemap.
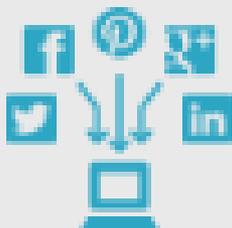

SEOMETRY FEATURES

✓ New Backlinks

Shows the top 100 (pagination coming soon) newest Western backlinks pointing to your website.
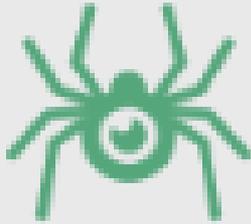

✓ Poor Backlinks

Shows the top 100 (pagination coming soon) poorest (lowest quality) Western backlinks pointing to your website.

✓ Top Referrers

Shows the top websites which refer the most traffic to your website. The backlink statistics for these sites is also shown.

SEOMETRY FEATURES

✓ Crawlability Test

Parses your robots.txt and lets you enter a URL to a page on your website. Displays whether or not that page can be crawled and/or indexed by Google and Bing.

✓ Mobile Support Test

Tests whether or not your webpage(s) will be displayed as "mobile-friendly" on Google search results. It checks meta tags, stylesheets, and embedded styles

✓ Headers

Checks the headers returned by the page for errors or problems. Allows you to check multiple pages on your website. This tool will also check redirection, and explains whether a redirection is permanent or temporary.

SEOMETRY FEATURES

✓ Speed Test

Runs a speed test on your website and provides a score, along with PageSpeed recommendations from Google on how to improve your website's speed.

✓ Link Analysis

Checks all links on a webpage, determines whether they are internal or external (outgoing), dofollow or nofollow, and displays this information in an organized table.

✓ Keyword Density

Finds the most common words or phrases on your webpage, checks them against the page title and meta description, and shows the weight of these words and phrases. A higher weight means a stronger impact on search ranks for that word or phrase.

SEOMETRY FEATURES

✓ Extract Meta Tags

Pulls meta tags out of the page and displays whether or not that meta tag is used by Google and Bing.

✓ Keyword Research

Displays estimated monthly search volume, CPC, and market value for unlimited keywords. It also shows relevant keywords similar to the one you enter.

✓ Competitor Analysis

Uses Google to find your competitors for a specific keyword. Displays their ranks, link strength, number of backlinks, number of unique backlinks, and % nofollow backlinks.

THANK YOU!
